Definitions

Research related keywords

- i) *Glossary*: an alphabetical list of words relating to a specific subject, text, or dialect, with explanations; a brief dictionary¹.
- ii) *Taxonomy*: A Scheme classification.
- iii) *Ontology*: The branch of metaphysics dealing with the nature of being.

¹ All definitions taken from the *Oxford Dictionary of English*. This is my favourite source of definitions.

Mind Map

A taxononmy of Robot Architecture

This will be a taxonomy I create using mindmap software.

Topic

TOPIC GOES HERE

I plan on exploring the topic of BLAH

Papers

Mendeley; Paper Database

I will be using Mendeley to organize my papers. Some features which it offers include:

- Cross Platform, including mobile
- Software not required. Can use from any browser and the articles will be synced when you log in from your own computer.
- Exports the database to BibTex and automatically keeps it synced.
- Has a MODERN & usable graphical user interface.

Papers

Mendeley; Paper Database

- Is widely used in the academic community, includes social features to work well in teams or share amongst a lab.
- has built in paper search features and can be customized to search databases available to you.
- Is free.
